Dreer's Superb Mixture of Single Early Tulips.

There are great differences in the various grades of mixed Tulips. As a rule they are made up by the growers in Holland out of cheap, undesirable or surplus lots, and little attention given to variety of color or time of flowering.

We import each season a large quantity of selected bulbs of the best-named varieties to make this superb mixture. It contains a carefully balanced range of colors, and must not be compared with mixtures as usually sent out, and notwithstanding the great care to make this the finest mixture ever sent out we are in a position to offer it at the price usually charged for a very inferior grade. 80 cts. per 100; \$7.00 per 1000.

Asparagus Plumosus Hatcheri.

It would hardly be possible to praise this new type too much, and it has already made a name for itself among the most critical growers. It is of very rapid growth, the fronds set closer on the stems than the very best type of Plumosus Nanus, making a fuller, heavier string and when cut lasts longer in good condition than any other and is just as good for bunching as the old sort. We will not be surprised if it quickly becomes the leading variety.

THE GLORY FERN (*Adiantum Farleyense* Gloriosa)

Adiantum Farleyense Gloriosa.

The Glory Fern or *Ruhm von Mordrecht*.

For the grower of Ferns for cutting this new Maiden Hair will undoubtedly prove a most important addition; it closely resembles *Adiantum Farleyense* and will make a splendid substitute for that fancy variety and it can be produced at much less cost, as it will thrive under conditions in which *Adiantum Farleyense* could not exist.

Anyone who successfully grows the ordinary varieties of *Adiantum* such as *Cuneatum*, *Croweanum* and *Hybridum*, can grow it under precisely the same conditions given to these sorts.

We have a splendid lot of 2 1/4 inch pots ready to send out now.
\$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

Adiantum Pulchrum Elegans.

Some 6 or 8 years since we sent out a beautiful small leaved *Adiantum* under the name of *Charlottae* which was greatly admired but which never became popular due to the fact that it has very weak stems and therefore did not make a shapely plant; in this new variety in which the foliage is very similar this weakness has been overcome and this new variety will undoubtedly prove a most valuable addition where fine foliage is desired. 2 1/2 inch pots, \$1.50 per doz.; \$10.00 per 100.

Adiantum Croweanum.

**We are the sole distributors of Mr. Crowe's stock of
this valuable fern.**

This for many years has been the standard variety for general commercial work. We will have a nice lot of 3-inch pots. \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

The Most Valuable Decorative Fern of Recent Introduction.

A most important addition to our list of Ferns. Its foliage is of a rich, deep, glossy green color, the pinnae or leaflets besides being wavy or undulated are also deeply cut or toothed, giving the plant a graceful light appearance, which makes it valuable not only as a dish Fern but for decorative work and apartment use.

HARDY PERENNIAL PLANTS.

For many years Hardy Perennials have been one of our principal specialties and our stock at the present time is unquestionably the most complete both in quantity and variety in the country.

Many planters not thoroughly familiar with this class of plants have an idea that nothing but a large, field-grown clump will give satisfactory returns the first season. This, as experience has taught us, is in most instances a mistake. A vigorous plant of proper size will, in nearly every case, give quicker and better returns than the best so-called "field-clumps" that can be procured. This fact is particularly appreciated by the leading Landscape Architects throughout the country who use Perennials in large quantity, the majority of whom give preference to the Dreer pot-grown plants.
